About Me

I am a new developer looking to gain experience and expand my knowledge base. I am drawn to developing because I enjoy creative problem-solving and diversity in my work; using different languages and tools to approach the same problem fulfills that desire in me. I have a passion for growth and exceeding the standards set for me. My talents for active listening and conversational mindfulness make me an excellent communicator.

Experience

Hourly Manager (Key), Outback Steakhouse: Fayetteville, NC – 2017-Present

As an hourly floor manager, my main role is problem resolution. I am responsible for ensuring guests are happy despite bad experiences. I am also performing some atypical functions for my position such as office administration, invoice management, minor accounting and creative project development.

Au Pair: Berlin, Germany – 2019

During my work as an au pair, I cared for two boys, 4 and 8. I was to collect them from school, cook, pack lunches, and perform some family chores. This job was taken for cultural enrichment. I desired to experience more than the world around me and push myself outside my comfort zone.

Education

College of Charleston: Charleston, SC – 2015-2016

- Completed 30 credit hours towards BA in International Business

Winthrop University: Rock Hill, SC – 2016-2018
